---

Here is the decon plan, signed in May. This was provided to HQ in May, but I will follow up and request that it be posted along with our latest signed waste management plan.

Vessel Decon Plan1.pdf

Also, I will compare the decon plans.

Steve,

Glancing at the latest waste plan, it says that "Decontamination of vessels, equipment and personnel are addressed in the MC252 Vessel Evaluation & Decontamination. Plan."

Can you circulate a copy of that document, and if signed and final, look to add it to the website?

Thanks.

Steve,

On the call this morning, it sounded like Reg 4 is working on version 7 of a waste plan. I guess our waste plans have diverged into two -- that's probably ok, but are we keeping an eye on things to make sure that our two plans are basically consistent?

Also, Reg 4 is working on version 2 of a decontamination plan for vessels and booms -- do we have a decon plan that is consistent with Reg 4's, and are decon elements covered by our main waste plan?

Pls advise. Thanks.

Larry
